SMB ROBOTICS USA

INDEPENDENT TECHNOLOGY PROVIDER

SERVICES OVERVIEW

Ideas, engineered into working systems.

Full-stack web development, AI automation and connected technology.

WHAT WE DO

Nine ways to move a project forward

01

Web & full-stack development

Web applications and dashboards, from frontend experiences to backend systems.

02

AI agents & automation

AI integrations, autonomous workflows, computer vision and tailored models.

03

Mobile app development

Flutter apps for remote control, live data and connected experiences.

04

Custom robotics

Robotic arms, CNC systems and purpose-built automation for practical applications.

05

Hardware & software integration

Connect physical machines, microcontrollers and software into one working system.

06

Smart home & IoT

ESP32, sensors and cloud-connected controls for responsive environments.

07

Circuit & PCB design

Schematics, simulation and PCB layouts for custom electronic hardware.

08

FYP mentorship

Guidance for Final Year Projects, including hardware, documentation and presentation support.

09

Free consultation

Help choosing a project around requirements, skill level, available time and budget.
